Our Elementary School

COMPUTER TECHNOLOGY EDUCATION

Weekly Computer Classes

All of our students meet with our computer education teacher, Ms. Carlos, three times per week for an accelerated computer class that builds students' skills from one year to the next. Students gain a good understanding of computer use and become able to use many computer-based programs.

How is this program different?

Unlike many public schools whose computer programs focus on typing and educational games, our computer class truly focuses on a well-rounded computer education. Our students learn how to use a computer as well as typing skills, but are also taught how to create documents, use spreadsheets, create slideshows, work on a coding program, and much more!

Technology

In addition to our extensive computer lab, all students are provided with a one to one Chromebook for classwork and learning.

Ask Our Teachers:

Why is progressive computer education so important?

"Progressive computer education is crucial for several reasons: digital literacy, preparation for the future, critical thinking and problem solving, promoting creativity, enhanced learning experience and global connectivity, just to name a few of the reasons." - Ms. Carlos
