

SPOTLIGHT ON *Our Elementary School*

TK & KINDERGARTEN

A strong start to Elementary School.

The smaller class size in our TK & Kindergarten class helps each student get a smoother transition into Elementary School. With fun science activities and creative art projects, the students in our TK/Kindergarten class can work on improving their motor skills and critical thinking skills that will help them excel in their future elementary grades.

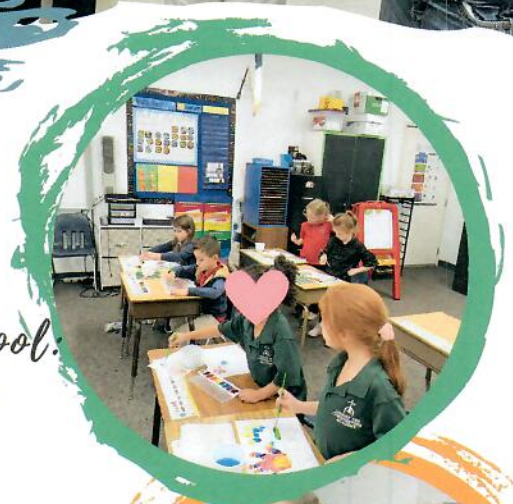

Learning:

Using the smaller class size as an advantage, our TK/Kindergarten teacher can work one-on-one with each student, providing individualized education. If a student is struggling with their reading fluency, they can receive more personalized practice and help. Whereas a student who is excelling with their reading can work on advanced work. Our TK/Kindergarten teacher loves to incorporate fun learning activities like math games, spelling word hunts, and many more to help students develop a love for learning!

Ask Our Teachers:

How is your Kindergarten class different from public school?

"Unlike public schools that have a class size of almost 30 students, our Kindergarten class at CTCA helps students form stronger foundations in their educational journey. By developing a family-like relationship with their teachers and classmates, students can really learn in a comfortable and safe learning environment!" -Ms. Choi
